In 2007, Montpellier University, the CNRS, the CEA and the National Graduate School of Chemistry, Montpellier (ENSCM) united their forces with the creation of the **Balard Chemistry Centre**. The **Balard Foundation** assists in the financial support of specific aspects of education, research and applications development.

The Balard Conferences, meetings at a scientific level of excellence in Chemistry, will be held 2 yearly from 2014.

The first Conference will focus on "Self-Assembly of Biomolecules", an integral theme of the Balard Laboratory of Excellence, CheMiSyst. The scientific organisation of the Conference is led by the IBMM Institute, one of the four research institutes of Balard.

In a 4 day scientific programme, each Balard Conference will invite 12 world-class speakers, offer another 18 scientists the opportunity to deliver oral communications, and 6 hours of poster sessions.
